Pengantar “Blue Economy”

- Pengertian “*Blue Economy*”
“*Blue Economy*” merupakan upaya penggunaan sumber daya laut dan pesisir secara berkelanjutan untuk keuntungan ekonomi dan menjaga kesehatan ekosistem laut.
- Tujuan Modul:
 - Memperkenalkan konsep “*Blue Economy*”
 - Definisi dan cakupan “*Blue Economy*”
 - Tinjauan sektor berbasis laut sebagai pilar utama “*Blue Economy*”
 - Penjelasan urgensi keberlanjutan di setiap sektor “*Blue Economy*”
 - Hubungan pembangunan ekonomi dengan konservasi laut

DEFINISI “*Blue Economy*”

- “*Blue Economy*” dapat didefinisikan sebagai ekonomi laut berkelanjutan dengan kondisi ekonomi seimbang dengan kapasitas ekosistem laut untuk mendukung aktivitas ini dan tetap tangguh dan sehat.” (UNESCO, 2020. Ekonomi Biru Berkelanjutan)
- Pemanfaatan sumber daya laut secara berkelanjutan bertujuan untuk pertumbuhan ekonomi serta peningkatan mata pencaharian dan pekerjaan untuk menjaga kesehatan ekosistem laut. (Bank Dunia)
Konsep yang muncul yang mendorong pengelolaan laut atau sumber daya 'biru' kita yang lebih baik. (Perserikatan Bangsa-Bangsa)

TINJAUAN UMUM EKONOMI BIRU

Perkiraan nilai Ekonomi Biru global mencapai sekitar USD 24 triliun.

Lautan adalah sumber
pendapatan utama
(3-5% dari PDB Global)

Pekerjaan berbasis laut
diperkirakan akan meningkat
120% antara 2010 dan 2030

Perikanan dan akuakultur
menyediakan mata pencarian
bagi 10-12% dari populasi global.

90% panas berlebih telah
disimpan di laut

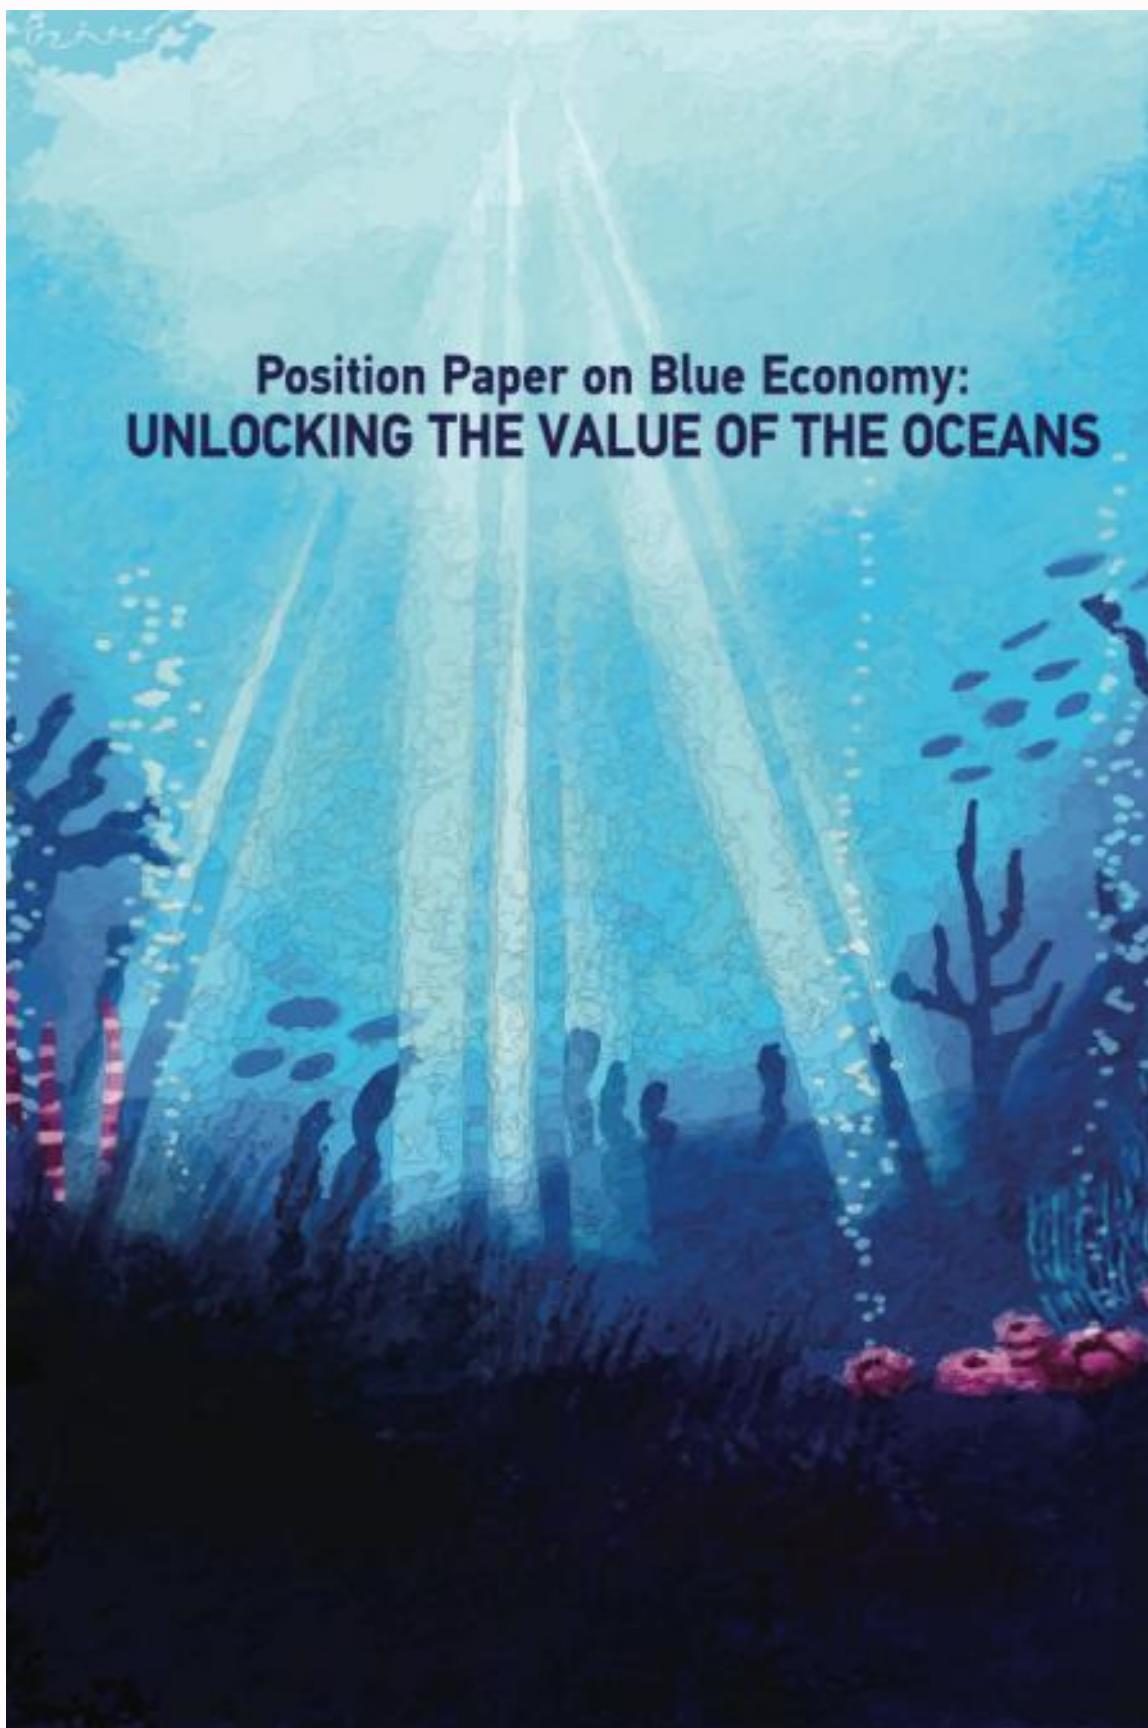

Malaysia memiliki luas pesisir dan laut seluas 614.159 kilometer persegi, hampir dua kali lipat daratannya, dan ukuran Zona Ekonomi Eksklusif (ZEE) sendiri adalah 453.186 kilometer persegi. Sebagai negara dengan sumber daya alam yang melimpah, Malaysia mempunyai potensi besar untuk memanfaatkan kelebihan Ekonomi Biru ini untuk nilai dan prospek ekonominya

MEMBENTUK WILAYAH EKONOMI BIRU MALAYSIA

Pada tahun 2021, Academy of Sciences Malaysia (ASM) bekerja sama dengan pemangku kepentingan untuk membuat kertas posisi 'Ekonomi Biru: Membuka Nilai Lautan.' Makalah ini bertujuan untuk mengembangkan ekonomi yang berkelanjutan, menguntungkan, inklusif, dan siap untuk masa depan untuk industri kelautan dan maritim Malaysia.

Sumber: ASM Position Paper

Cetak biru ekonomi biru digariskan dalam Rencana Malaysia ke-12, bertujuan untuk mempromosikan pembangunan berkelanjutan di kawasan pesisir dan maritim.

Blue Economy: Unlocking the Value of Our Oceans

Oceans and seas cover approximately 71% of the earth's surface. They represent a new economic perspective – the Blue Economy, that is largely driven by a growing demand for new and sustainable sources of food, jobs and economic opportunities from marine and oceans resources

Malaysia being a maritime nation with 4,675 km of coastline and over 870 islands, sustainable development of the ocean and marine resources will have a significant positive spill over impact on the socio-economic drivers of the country, as identified in the 12th Malaysia Plan and 10-10 MySTIE

Framework. A vibrant Blue Economy ecosystem is predicted to potentially increase the contribution of marine and ocean resources from 21.3% of the GDP, to 31.5% of the GDP, which is close to RM 1.4 trillion contribution to the Malaysian economy, from 2020 to 2030.

To fully realise the potential of the Blue Economy in Malaysia, public-private as well as community partnerships are critical to facilitate the development of collaborative and co-creative platforms to generate better return on value (ROV) from the ocean and marine resources of the country.

DORONGAN STRATEGIS MALAYSIA UNTUK EKONOMI BIRU

MPFN Agrees To Develop Malaysian Marine Spatial Planning

- PM

⌚ 23/10/2024 11:12 PM

KUALA LUMPUR, Oct 23 (Bernama) -- The government has decided to develop a Malaysian marine spatial planning to drive the Blue Economy and enhance national marine governance.

Prime Minister Datuk Seri Anwar Ibrahim, who chaired the 46th meeting of the National Physical Planning Council (MPFN), said the initiative would increase the potential of the country's marine resources.

"The government is confident that creating this clear policy will optimise the potential of our marine resources as an economic asset for the nation while boosting investor confidence in Malaysia's investment prospects," he said in a post on Facebook today.

Anwar said the meeting also agreed to further strengthen the development of disabled-friendly infrastructure in every building and public space, in line with the MADANI principles that emphasise inclusivity to ensure no group is left behind in the nation's development.

He said the meeting served as an important platform for discussions between the federal and state governments to review issues related to urban, rural and land-use planning for the common good.

- Perdagangan luar negeri

SEKTOR TRADISIONAL

MAJOR ECONOMIC ACTIVITIES

INDUSTRI MAPAN YANG TELAH LAMA DIKAITKAN DENGAN LAUTAN

Dua puluh tiga persen dari PDB Malaysia disumbangkan oleh Ekonomi Biru, yang didominasi oleh energi lepas pantai, termasuk produksi minyak mentah dan gas alam dan kilang minyak bumi, diikuti oleh perikanan dan akuakultur serta transportasi dan pariwisata laut (Juneja et al., 2021). Pada tahun 2023, ekonomi kelautan global diperkirakan akan berlipat ganda dari perkiraan tahun 2010 sebesar USD 1,5 triliun, atau 2,5% dari nilai kotor global, menjadi USD 3 triliun (Sumaila et al., 2021).

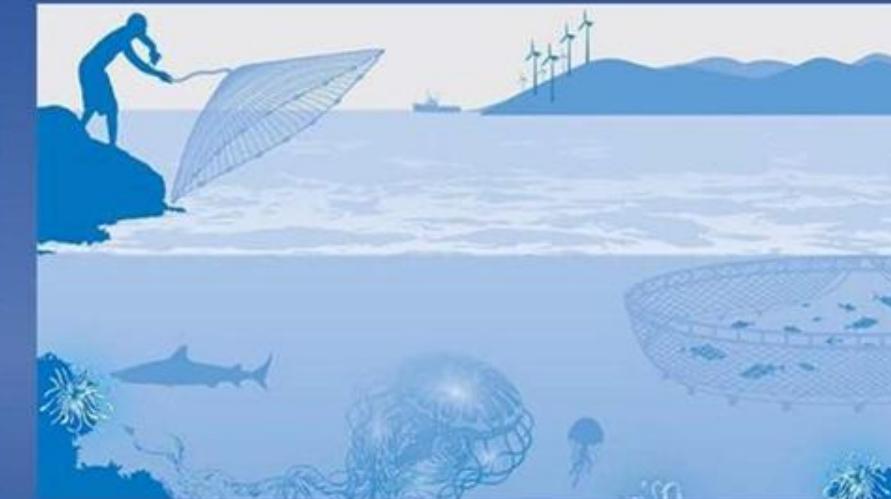

What's “New” About the New Blue Economy?

Ocean
Economy

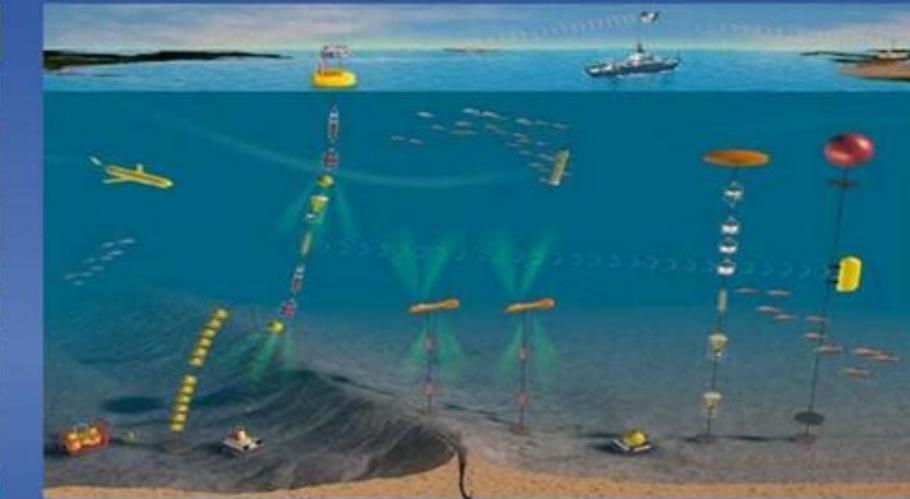

All economic activities related to the oceans, seas, and coastal regions.

Blue
Economy

Couples the promotion of economic growth, social inclusion, and the improvements of lives and livelihoods, while ensuring environmental sustainability of the ocean and coastal areas.

New Blue
Economy

Uses **technology, data and information** to catalyze public and private sector innovation and inform smart decision making across all Blue Economy sectors.

NOAA

Peluang dan Tantangan

01

KEBIJAKAN

Kurangnya kebijakan kelautan nasional dan rencana tata ruang laut yang menyeluruh untuk mengarahkan pertumbuhan berkelanjutan industri terkait laut (Azam et al., 2023).

02

SUMBER DAYA

Tenaga kerja dan sumber daya yang tidak mencukupi untuk menegakkan peraturan secara efektif dan mengelola wilayah pesisir dan laut untuk perlindungan (Azam et al., 2023).

03

KEAHLIAN

Kurangnya data dan keahlian teknis untuk melakukan analisis mendalam (Azam et al., 2023; Saarani et al., 2023).

04

TEKNOLOGI

Dukungan dan teknologi yang tidak memadai dapat membatasi efektivitas inisiatif pengelolaan laut (Azam et al., 2023; MIDA, 2022).

Kegiatan: Menjelajahi Sektor Ekonomi Biru

Latihan Kelompok:

- Pilih satu sektor ekonomi biru
- Mengidentifikasi contoh dunia nyata
- Diskusikan satu tantangan keberlanjutan
- Menyajikan temuan kepada kelas
